Work Experience	2023-2024	The National Library of Israel / UX UI Designer I played an integral role in the design of a new cross-site interface for NLI as part of NLI's rebranding project. My work included the implementation of a new design system and the creation of new features and an information hierarchy. I was involved in every stage of the design process, including ideation, wireframing, user flows and prototyping. I collaborated with a team that included a variety of roles.
	2021-2023	Freelance UX UI Design Created a visual language and designed through a full interaction and experience design process across multiple platforms, such as web, tablet and mobile. Led products from ideation through research, wireframing, user flows and prototyping.
